Oops forgot to change that when I copy/pasted.

Fixed now.

Thanks

Hi Ex. 4 - CBI

The third header should read **Related Links**. Right now it has Reports and Documents, twice.  
Thank You

Subject: Fw: Dimock raw data online

Thanks Paul,

I suggest putting a sentence or two underneath the "raw data" link explaining what it is. Something like this...

This link will bring you to the raw groundwater data collected during the Dimock Residential Groundwater Site sampling events. Due to the large number of FOIA requests for this information, EPA is providing this link for easy public access. The data is without narrative or conclusive summations.

Related links:

For additional information and Site-related documents, go to these related websites:

- [www.epaossc.net/dimock\\_residential\\_groundwater](http://www.epaossc.net/dimock_residential_groundwater)
- [www.epa.gov/arweb](http://www.epa.gov/arweb)
- [www.epa.gov/aboutepa/state/pa.html](http://www.epa.gov/aboutepa/state/pa.html)

Paul, Is the description correct? I tried clicking on the link below but didn't go anywhere, so I haven't actually seen the data dump for myself yet.

If it is accurate, I'll forward this email to those who need to approve the suggested language prior to putting it on the webpage

Thx.

Trish:

Humane Zia in ORC is saying the tentative date, subject to final management and HQ approval, for going live with posting the raw lab data on the website:

<http://intranet.epa.gov/r3intran/hscd/Dimock/PAN000306785.htm>

is Thursday, July 26, 2012. Can you get your text with instructions how you want it to appear to [Ex. 4 - CBI] as soon as possible? Once [Ex. 4 - CBI] has the site looking the way you want it - I think you should have Humane and Kathy Hodgkiss review.

[Ex. 4 - CBI]

Please take a look at the Region 8 site:

<http://www.epa.gov/region8/superfund/wy/pavillion/docs.html>

and along with Trish's text - dummy in a link for the Raw Lab Data similar what they did. Unlike Region 8, where they have "QA Documents", "Monitoring Well Drilling Information", etc. initially, we will ONLY have the Raw Lab Data and, I suspect, add some other items later. But I want the reviewers to know what it will look like even if the link won't take them to the ftp site yet. I have to get with Carol O'Tormey and get her approval with moving forward with the method we have to getting the data on the ftp site.

Please call me if you have any questions.

Thanks,

Paul
